ELSEVIER

European Journal of Operational Research 126 (2000) 689–691

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

www.elsevier.com/locate/dsw

Contents Volume 126

1 A framework for the description of evolutionary algorithms
A. Hertz and D. Kobler

13 Heuristics for the stochastic/dynamic user-optimal route choice problem
H.-K. Chen and G. Feng

31 Valid inequalities for a class of assembly system problems
A. Pinnoi and W.E. Wilhelm

51 Using DEA to obtain efficient solutions for multi-objective 0–1 linear programs
F.-H.F. Liu, C.-C. Huang and Y.-L. Yen

69 Approximation of linear programs by Bregman's D_F projections
P. Kas, E. Klafszky, L. Mályusz and G. Izbirak

80 Allocation of tasks to specialized processors: A planning approach
K.J. Becker, D.P. Gaver, K.D. Glazebrook, P.A. Jacobs and S. Lawphongpanich

89 Economic expectations, fuzzy sets and financial planning
M. Tarrazo and L. Gutierrez

106 An effective implementation of the Lin–Kernighan traveling salesman heuristic
K. Helsgaun

131 Scheduling multipurpose batch process industries with no-wait restrictions by simulated annealing
W.H.M. Raaymakers and J.A. Hoogeveen

152 A multi-criteria agency model with incomplete preference information
R. Vetschera

166 Design of parallel algorithms for the single resource allocation problem
D. Morales, F. Almeida, F. García, J.L. Roda and C. Rodríguez

175 Restricting weights in value efficiency analysis
M. Halme and P. Korhonen

189 Marketing-production coordination in channels of distribution
K.R. Kumar, A.P.S. Loomba and G.C. Hadjinicola

218 A fuzzy satisficing method for electric power plant coal purchase using genetic algorithms
I. Shiromaru, M. Inuiguchi and M. Sakawa

231 Editorial: The first decade of G-networks
E. Gelenbe

233 G-networks: A versatile approach for work removal in queueing networks
J.R. Artalejo

250 Multiple class G-networks with list-oriented deletions
J.-M. Fourneau, L. Kloul and D. Verchere

273 Reliability modelling using G-queues
P.G. Harrison, N.M. Patel and E. Pitel
288 Reinforcement learning with internal expectation for the random neural network
U. Halici
308 On G-networks and resource allocation in multimedia systems
E. Gelenbe and H. Shachnai
319 Survey of random neural network applications
H. Bakrcoglu and T. Koçak
331 Training the random neural network using quasi-Newton methods
A. Likas and A. Stafylopatis
340 A global optimization algorithm for the three-dimensional packing problem
L. Faina
355 An operational decision model for lead-time and price quotation in congested manufacturing systems
M. ElHafsi
371 Input control in a batch production system with lead times, due dates and random yields
Y. Wang and Y. Gerchak
386 A simple method for obtaining weakly efficient points in multiobjective linear fractional programming problems
B. Metev and D. Gueorguieva
391 On weighted centers for semidefinite programming
J.F. Sturm and S. Zhang
408 A Lagrangean relax-and-cut approach for the two-stage capacitated facility location problem
A. Klose
422 Optimal planning in large multi-site production networks
C.H. Timpe and J. Kallrath
436 The use of data envelopment analysis in the regulation of UK water utilities: Water distribution
E. Thanassoulis
454 A note on a modified simplex approach for solving bilevel linear programming problems
M. Campelo and S. Scheimberg

459 Fuzzy multicriteria analysis for performance evaluation of bus companies
C.-H. Yeh, H. Deng and Y.-H. Chang
474 Sequencing jobs on a single machine: A neural network approach
A. El-Bouri, S. Balakrishnan and N. Popplewell
491 The value of runway time slots for airlines
J.-M. Cao and A. Kanafani
501 Assessing the relative efficiency and productivity growth of vehicle inspection services: An application of DEA and Malmquist indices
J. Odeck
515 The generalized DEA model and the convex cone constrained game
G. Hao, Q. Wei and H. Yan
526 Pattern classification with principal component analysis and fuzzy rule bases
V. Ravi, P.J. Reddy and H.-J. Zimmermann
534 Optimal burn-in decision for products with an unimodal failure rate function
D.S. Chang
541 Minimax reference point approach and its application for multiobjective optimisation
J.-B. Yang

557 Minimizing maximum lateness under linear deterioration
A. Bachman and A. Janiak
567 Analysis of reactive scheduling problems in a job shop environment
I. Sabuncuoglu and M. Bayız
587 An exponential queue with competition for service
P.H. Brill and M. Hlynka
603 Capacitated inventory problems with fixed order costs: Some optimal policy structure
G. Gallego and A. Scheller-Wolf
614 The exact overall time distribution of a project with uncertain task durations
C.W. Schmidt and I.E. Grossmann
637 Resolution of fuzzy regression model
H.-F. Wang and R.-C. Tsaur
651 A sampling-based method for generating nondominated solutions in stochastic MOMP problems
J.L. Ringuest and S.B. Graves
662 New stopping criterion for genetic algorithms
H. Aytug and G.J. Koehler
675 Multiobjective second order symmetric duality with cone constraints
S.K. Mishra
683 On consistency of the weighted geometric mean complex judgement matrix in AHP
Z. Xu
688 Erratum to 'The discrete lot-sizing and scheduling problem: Complexity and modification for batch availability' [EJOR 124 (3) (2000) 511–528]
W. Brüggemann and H. Jahnke
689 Contents of Volume 126
